Subject: Phone Co. rates on internet

Dear Sirs,

It is my understanding that the phone companies are petitioning the regulatory bodies to allow them to apply long distance rates to Internet useage. I am very opposed to this. I currently have free internet access provided by my school which has been extremely helpful to me in my studies as I am also a single parent and don't have alot of time to spend in the library. Allowing the phone company to charge long distance, per minute rates for my access will make it necessary for my school to cut it's free access to the students and many thousands of us across the country will suffer.

Internet useage in general will drop sharply along with sales of new computers, modems and software. Because I am on a limited budget at this time I take advantage of shareware sample programs before investing in any new software for my pc.

One of my children has Attention Deficit Hyperactivity Disorder and I have been able to receive alot of much needed information and support from an ADHD listserve group that I belong to who's membership, at last count, stood at over 500 parents and professionals. These new charges will effectively end listserve groups which are of great benefit to many people.

Thank you for you time and consideration of this matter.

Susan Winfrey

To Whom it May Concern:

I read on the internet that the major phone companies are petitioning you to be able to charge their customers for using the internet. Please, please, please, please, please do not let the phone companies charge their customers an extra fee for connecting to the internet. We are already paying for an additional line plus the time when we can't access a local number.

In reference to the petition asking that phone companies be allowed to charge us hourly fees,

Realizing that phone companies are already benefitting,

Understanding that other mediums such as television broadcast stations could be utilized instead,

I implore you to deny this request.

The internet is the greatest source of shared knowledge we currently possess. Technologies such as this should not be monopolized or limited in the pursuit of wealth.

Most Sincerely;
Cheryti j. McGhee

Subject: ACTA Internet Phone Petition

Please do not impose additional fees on ISPs

>I have heard through the grapevine that the telephone carriers are
>petitioning the FCC to charge Internet users a fee, much like long
>distance, for our online time. This is a blatant attempt to get something
>for nothing from people who have already paid their freight.
>
>I pay extra to my local phone company, Pac*Bell, for unlimited local
>calling. They have happily accepted this money, even when I make no
>calls at all. I also pay my Internet Service Provider a monthly fee for
>unlimited online time, and they have taken that money and the fees of
>other customers and built, along with all the other Internet
>Service Providers, including the Federal Government, a nationwide
>network that is changing the face of information exchange. Now the
>phone carriers, jealous of the fact that somehow the ISP's can do with a
>flat monthly fee what the phone carriers required exorbitant per-minute
>rates to do, are trying to horn in on the deal by "charging a fee" (read
>"extorting") for something that I have already paid for.
>Why is unlimited local calling okay for voice calls to Aunt Mabel, but not
>for calls to my local ISP? Why should AT&T or Pac*Bell get anything from
>the Internet when the ISP's and the Federal Government have paid for
>the backbones and switching equipment? All this does is place
>Internet access out of reach for most of the American people. I already
>feel rather elitist because I can afford a telephone and an ISP account
>and a computer, when many of my friends and co-workers cannot
>afford all three as it is. I do without other things to make this possible,
>but even I might be driven off the Internet were a telephone company to
>start charging me for access to a system they have not built.
>
>The FCC is a body dedicated to regulating communications for the greater
>good of the American people, not for the express purpose of lining the
>pockets of bloated monopoly holders. I cannot switch from Pac*Bell to
>another phone company, no matter how bad the service becomes. While

Assuming that this is still an active issue, I wish to register my extreme opposition to any attempt by phone companies to impose user fees of any kind on internet users. I currently pay a rather sizable phone bill on a monthly basis and in accordance with rules and laws already established. I believe the phone companies are getting all they can reasonable expect from me. My internet access is a local call, and I can only see this move by phone companies as an attempt to cash in on something that current law would not permit them to touch otherwise.

Sirs,

It has come to my attention, by both the newspaper and my local ISP, = that the telephone companies have approached the FCC to get a ruling = passed that would allow them to charge a "per minute" for every line = that the ISP has connected. The ISP would have no other option than to = pass this additional charge on to the end user (myself). If this is = allowed to happen, many, myself included, would be forced to leave the = Internet due to excessive cost. This would also force the providers out = of bussiness because they would not have any customers or at least a = large enough to sustain operations. Thus leaving the telephone company = as the sole ISP offering Internet access.

Please, for the sake of us little guys, put a stop to the telephone = company. They are a business and should be responsible to make = improvements as required to keep up with growth; my provider does and = doesn't charge me for it, he does it cause he wants to stay on top. It = seems like the phone companies feel that they can do what they want = because we need a telephone these days.

Well, they are right in one respect, but they would also lose a lot of = additional revenue when people start dropping phone lines that they once = used for the Internet, starting with the lines that the ISP's would no = longer need because of the lost customer base. Sounds like a bad = business decision by the Phone company...=20

Please, once again, help keep the Internet open...

Thanks for listening,

James Braun

I'm just writing to you because I heard that the phone companies are petitioning to charge a fee to internet users who use the phone lines. This isn't right because either we or our ISP (Internet Service Providers) are already paying for use of the phone lines, and from what I understand of modems, etc, (I'm an Electrical Engineering senior in college and we've studied this), it doesn't cost any extra money to send a modem communication over the phone lines as opposed to simply talking.

Even though many people can now communicate with less phone lines (high speed modems hooked up to routers, hubs, etc), it doesn't mean they can charge us more. Especially since they're not doing any extra work for this. It is the users and ISP's that are doing more work to make use of this medium, not the medium itself.

I believe the phone companies have suffered losses recently with their long distance wars, and are simply looking for some fast cash. I didn't pay for their games then, and I don't want to pay for them now.

Thank you for your time,

George A Fitch III

To whom it may concern,

There has been talk that the telephone companies are planning to add additional fees for internet access providers and they are using the excuse that the phone traffic is too heavy on the system to accomodate everybody. What is really happening is that the telephone companies want to corner the market concerning internet access and they want to eliminate as much of the competition as possible. This country was set-up for free enterprise and commerce and the telephone companies are trying to eliminate the competition. Its almost like putting a tariff on the internet access providers. The only thing the telephone companies should do to promote business is to make there site that much better so they draw attention to themselves. Not effect other businesses to promote their own. If you look at it you know what I'm saying is right. My vote is NO for this to happen. Also, if you throw out this proposal please make sure they don't add hidden fees some other way just to get their way.

Thanks from a concerned citizen,
Kevin Metz
